

SCS International

Newsletter no. 2 2012.

Newsletter

**Website SCS International
has been
professionalized with CMS .**

From now on the website from SCS International has new features so new products and new developments will be published within 1 or 2 days. This way the SCS website is always up to date. Also new buttons like FAQ (Frequent Asked Questions) or Distributor (if you want to become a distributor for SCS international) are added.

Within one click you get answers on frequently asked questions, you as a user of SCS International products might have, which will be updated on a regular basis . Technical or operational issues will be solved. You know exactly what to expect when you want to be a distributor and also what you need to fulfill to become a distributor. SCS is clear about this. Also more detailed pictures of products of SCS are displayed. In future we will show films to show how our products perform and practice tips.

Try the site yourselves and visit www.SCS-International.nl and find out what is new. Please leave a comment if you like it, or when you have suggestions to improve.

3 - Pocket Sorter BNS 2000

SCS International launches new (smallest)

3- pocket (vertically) sorter in the market.

BNS 2000

This sorter, a highly advanced machine, with latest state of techno-logy is equipped with newest sensors and features in the market. With a 5" LCD color touch screen, working is a pleasure.

Along with the latest operational modes, this machine is equipped with double CIS possibilities, for e.g. serial number reading, and is able to fulfill highest fitness sorting levels asked for in the market. Printer and remote screen are optional.

As a strong front office solution this machine is a jewelry in your office and will be highly appreciated by many users, which ask for high performance sorting and counting and easy in use practice, especially for high capacity situations.

The product has been intensively tested and shows high quality results. For more technical details, features and a downloadable leaflet: www.SCS-International.nl.

Money sorting
"different"
style

New development

Real time cash management info at your fingertips.

Given the growing impact of regulations in money transfer and the need for cash, as also the increased impact of counterfeit banknotes, SCS International is developing a web based solution to control, monitor and even update your banknote sorters and authenticators in seconds with newest software as also allowing you to monitor money flow whenever wherever you want.

Monitor banknote-handling machines online, remotely.

You can monitor real time any banknote-handling machine in your network, safely.

Important data can be monitored:

- Operating information
- Alarms and statistics
- Current status and failure code

2-way interaction with your Authenticator /sorter.

To reduce the risk of not being up to date and not seeing the latest counterfeit issues, it is possible to update your machines through the LAN connection almost over night .

Easy data download

Download your data logger no matter where your machine is located in the network. You do not need to have a service visit or go locally to update your software, to reset counterfeit info or to access historical data. You can perform a full download of your BNA 800 or BNS 1000/2000 data loggers immediately.

Control your machines, are aware of the uptime and keep maintenance at your service, update the counterfeit software and keep your machines at highest level with this software.

This service will be possible through the software one can buy on dvd at SCS International and/or her partners. Show your interest and go to our website:
